Access Office Industries®

Education Furniture

So Why Choose Access... because customers are the most important part of our business. We are committed to provide libraries and educational institutions with the highest quality and most up to date and innovative products on the market. Our success is defined by the fact that customers return to Access time and time again. Another great advantage for our customers is that we are a local supplier with local stock!

Technology and collaborative work environments are changing the design of learning spaces. The idea that students must be seated at desks working in rows is quickly becoming archaic.. Collaborative learning environments are now commonplace and as such, classrooms need more flexible furniture to cater to new teaching styles.

Since 1991 Access has been providing the right furniture solutions for working and learning environments across WA. We have focussed on quality, design and functionality, developing our product ranges to not only meet the needs of the modern school but also create fresh, inspiring environments. This innovation allows us to provide solutions that are economical, practical, functional, and stylish. From the corporate office or executive suite to the primary or higher education classroom

So, if you're looking for a company offering great service and quality products, call the **Access** team today on 08 9493 3776.

Access, AUSFILE & Eclipse are wholly owned trademarks of the Global group of companies

WEST AUSTRALIAN OWNED AND OPERATED

Access Office Industries is a wholly West Australian owned and operated business. Our business focus is on the supply of high quality education and commercial furniture for schools, libraries and commercial workspaces. We keep stock in our two warehouse and assembly facilities in Kenwick, Perth. No need to wait for stock from the Eastern States. Access is owned and operated by industry specialists, with over 100 combined years of experience.
Access Office Industries is part of the Global Group of companies.

QUALITY & WARRANTY

At Access we pride ourselves on the quality of both our products and our service. all items offered in our catalogue are designed and selected to meet the needs of the educational sector. All products in our catalogue offer a 1 year warranty as a minimum and most are guaranteed against faulty material and workmanship for 5 years or more. See individual products for warranty period.

IMPROVED HEALTH

MDF boards manufactured for the Australian market should meet the appropriate standards - AS/NZS 1859.1:2004: Reconstituted wood-based panels. Both Australian and European standards limit the amount of formaldehyde that can be released from reconstituted wood based panels. There are two European formaldehyde classes, E1 and E2, depending on levels of formaldehyde emission measured. The release of formaldehyde from E1 boards is less than 0.1 ppm (parts per million) and for E2 boards it is between 0.1 ppm and 0.3 ppm

SUSTAINABILITY.

We continually aim to minimise our impact on our environment throughout our business from manufacture to delivery. We are ISO14001 certified and most of our products are GECA certified. Wherever possible we source our materials from ISO14001 certified factories and fully investigate their environmental credentials to ensure they meet our strict standards. For example all our board material is low or formaldehyde free and all timber used in our processes is made from pre and post-consumer waste wood. All standard fabrics used for our upholstery are manufactured using either recycled raw materials, or renewable and compostable fibre types. We recycle the original packaging materials to protect the products during the delivery process to limit waste and we carefully plan our delivery routes to minimise our fuel usage and emissions. These are just some of our environmental initiatives; further information is available in our environmental policy @ www.accessoffice.com.au

SAFETY

Many of our products are independently tested by one of the worlds largest testing authorities to ensure they conform with the stringent requirements of Australian and international standards that focus on furniture comfort, safety and durability. To ensure the highest level of performance and durability we test our furniture to level 6, which is a severe commercial use rating.

CONTRACTED SUPPLIER TO WA GOVERNMENT

Access Office Industries has been providing our range of Commercial and Education furniture to the WA government since 2002 on Contracts: 29702, 10705 and now on CUAFRN2012 & ETT2322/2013. We are also a WALGA preferred supplier. Please feel free to visit our Kenwick showroom to view our range.

PLANNING

Whether your room has a single use or needs to perform a variety of functions, our furniture is designed to be flexible and easily configurable for all spaces active learning friendly.

We are here to help you get the most from your space and provide a free design and space planning service. tell us what your aspirations are, what you need the room to do, and we will work with you to come up with a design which works for you, within your budget. Our local sales team are happy to visit you and discuss your requirements in person; they can then measure up, offer advice and provide a free, no obligation quotation.

From a simple 2D to a full 3D colour model we can provide an appropriate plan of your space. as part of our planning and design service we also offer product samples, finish colours and fabric swatches to ensure we select the right furniture for your needs.

Call us now and let us help you visualise your project.

SEAT AND DESK HEIGHT GUIDE

(455H) 405H 370H 350H 335H 300H

How to Choose the Appropriate Chair Size for Students

Chairs are available in a variety of sizes, be sure to pick chairs that will be comfortable for children to sit in while also complementing the other furniture in your classroom. A general rule to remember when you're trying to determine a suitable chair size is that children's feet should be able to touch the floor when they sit back in the chairs.

Appropriate chair seat height is often based on children's age this is outlined in various standards around the world such as AS/NZS 4610 and BSEN 1729

How to Choose the Appropriate Desk Size for Students

The general rule for desk heights in education classrooms is the space between the seat of the chair and the underside of the desk or underdesk trays (if fitted) should be 17.5 - 20 cm. That's just the right amount of space for children to be able to fit their legs under the table, and it also ensures that the table is low enough for children to comfortably rest their elbows.

When selecting desks, you should also consider any special needs students who are in your class. If a child is in a wheelchair that doesn't have a built-in writing tablet, they will need a desk or table in the classroom that is high enough for them to sit at comfortably.

You should mainly focus on the table height, chair seat height, and children's age when deciding which table size is the right fit for your students. The chart below makes chair and table recommendations based on these factors.

Year	Body Height	Desk Height	Lynx Chair Height	Lynx Size Mark Colour
7 to 12	161 - 180 cm	71 - 78 cm	45.5 cm	455H
5 to 6	157 - 162cm	68 - 71 cm	40.5 cm	405H
4	143 - 158 cm	68 cm	37 cm	370H
3	132 - 144 cm	62 cm	35 cm	350H
1 to 2	129 - 133cm	57.5 cm	33.5 cm	335H
Kindy	115 - 130 cm	52 cm	30 cm	300H

ECLIPSE®
SOFT
SEATING

FREEWAY is a modular system of narrow and wide ribbons of upholstered seating which undulate to form seats and armrests creating large central or terminal curved lines. Our modular seating enhances any library environments' quality with its particular play of shapes.
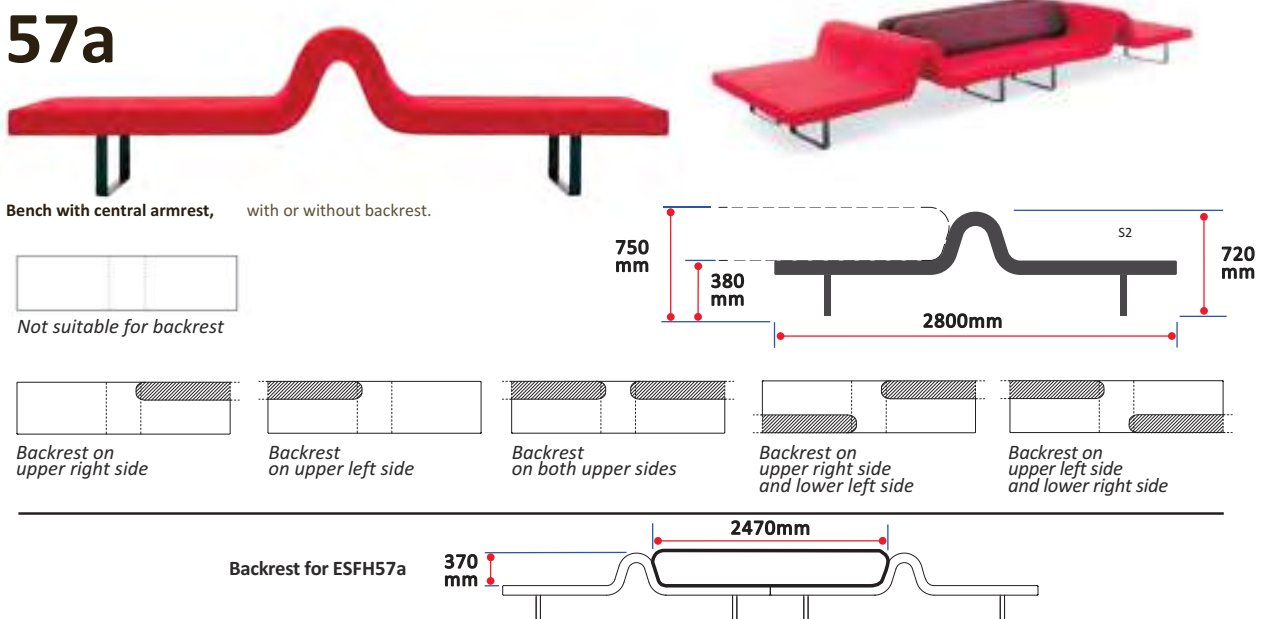

European styling, the alternation of curves and horizontal planes offers a marked visual impact. The broadness and versatility of the collection allows limitless configurations.

The Freeway collection includes single and modular elements:

- benches, sofas and tables (Eclipse ESFH57 tables) that forms islands,
- linear, angular benches, curved compositions and is aimed particularly to contract environments such as libraries.

large spans are suspended between floor armrests or on brushed stainless steel legs, powder coated or satin chromed steel legs. The internal frame is constructed of welded steel and upholstery of different densities of non-deformable polyurethane foam, with a lining of polyester padding.

ECLIPSE FREEFLOW BENCH OTTOMAN

- 430mm seat height
- Modular and connectable system
- Multi piece and reconfigurable
- Satin Chrome legs; colours: custom, to order

Like FREEWAY, FREEFLOW is a fluid, flowing modular upholstered seating system designed mainly to suit large spaces. Its curvy, linear modules offer maximum versatility for use in public waiting or relaxation areas. Based on the idea of a freeway overpass, this sofa system comprises two upholstered strips, one for the seat and one for the backrest.

Depending on how it is used, these strips can criss-cross each other to create an interplaying form, and at the same time, it also allows for back-to-back seating, ideal for central positioning within a room.

ECLIPSE® TABLES
&
STUDENT DESKS

Dura Edge™

The most revolutionary desk-edge development of the century.

HIGH PRESSURE LAMINATE

MDF CORE

HIGH PRESSURE LAMINATE

Patented DURA EDGE™

As the name suggests, Eclipse® **Dura Edge**™ will stand the test of time.
With a remarkably tough impact resistant laminated writing surface and a unique seamless urethane edge, the **Dura Edge**™ desktop is one of the most durable student desk tops in the world.

ECLIPSE® TABLES
&
STUDENT DESKS

Eclipse® **Dura Edge**tm helps protect your desktops from knives, compasses, nail clippers, pens, pencils, chairs, walls, graffiti and busy fingers!

The Eclipse® **Dura Edge**tm bonds to both High Pressure Laminates and the radiused core. This bonding action creates a permanently sealed desk top with remarkable longevity for extended classroom use.

Designed in the USA, the Eclipse® **Dura Edge**tm desktop is made from recycled wood with a High Pressure Laminate surface on both sides. Its unique feature is the thick urethane edge. The urethane is thermally fused directly to the edge at 2200 psi and 75^0c making it totally seamless and virtually impossible to remove. This process gives off no volatile organic compounds (VOCs), is odour free, peel resistant, and sterilized.

Eclipse® **Dura Edge**tm desktop features
- o completely seamless
- o resistant to impacts and abrasion
- o won't peel, chip, crack or fade
- o uv stabilised
- o virtually impossible to remove
- o tops can be made any complex shape
- o thousands of Pantone® edge colours available
  - ▪ for a complete list of Pantone® colours please visit http://www.pantone-colours.com/

## Eclipse "SHAPES" Adjustable Height, "Design Your Own" Desks

Take your classroom to the next level with Eclipse Shapes Collaborative School Desks. Eclipse Shapes tops and legs brings simplicity and functionality in a customisable package made to fit any classroom or study setting. Mix and match a variety of desk top shapes and combine with our range of height adjustable legs to create the perfect solution for your classroom. Our versatile student desk shapes offer numerous configurations, ultimate flexibility and workspace comfort to help your students maximise their learning. The contoured sides of the work surface have an identical curve radius, enabling you to arrange your learning area in multiple collaborative clusters, rows and more.

These school desks are designed for the dynamic classroom. Durable, height-adjustable steel legs and smooth melamine work surfaces with ergonomic contours help every student get the perfect fit. Whether your students prefer right- or left-handed desking, independent work, learning partners or group projects, these adaptable student desk shapes are an excellent choice.

STEP 1: Choose a top shape (or create your own)

STEP 2: Choose a leg

Pneumatic Adjustable Height Student Desks

Re-imagine the workplace, rethink the classroom. Reconsider the vertical possibilities of an adjustable work space! From your seat to your feet the Eclipse Sit/Stand adjustable height student desk offers a smooth integrated, quiet pneumatic adjustment and locking mechanism that transitions the work surface from a comfortable sitting height to standing height and back as needed.

Our Sit/Stand student desks offer a full range of flexibility for learning and workspaces. One of the latest trends in the office is to stand while working. Too much sitting has a poor effect on an individual's overall health. Too much standing, on the other hand has its own negative health effects. Fixed height student desks for either sitting or standing are not always the best answer for the modern learning space. Enable individuals to adjust the height of their worksurface according to their body height, immediate needs, and requirements of use, such as presentation, instruction or computer work. Our Sit/Stand desks offer teachers and students the option to sit or stand and at the height that is the best for them.

Purchasing desks and tables for your classroom or office is a decision for which you will weigh the cost, the use of the furniture, and the health of the user. When considering the cost, you will be surprised at how inexpensive our Sit/Stand desks are! Our Sit/Stand desks feature metal-to-metal connections fully-welded legs and German designed pneumatic mechanisms, guaranteeing you a durable and low-maintenance table solution.

LIBRARY
SHELVING

Eclipse Classic Steel Library Shelving

What Makes our Shelving Better?

Eclipse Classic Library Shelving has a number of unique features for optimal flexibility and structural integrity that you won't find in any other Library Shelving system. It is GECA Certified and to ensure the strength and quality we had it **tested and certified to AS2273** by Intertek, an international testing authority.

The following features make Eclipse Classic the best choice:

1. Reinforced shelves with a 50mm upturned back and a folded section welded under the front edge which doubles the weight bearing capacity, you will never see a bent shelf on our system!

2. The shelf support brackets have a full length return fold that supports the shelf right to the front edge. This prevents the shelves from flipping up if stood or leaned on.

3. 18mm of cut steel thread where it really counts. One loaded bay of shelving can can weigh up to 600Kg. All of this is ultimately supported by the threads for the adjustable feet or castors.

4. Bolt fixed and MIG welded horizontal braces eliminating the need for extra "locking devices".

5. 2mm thick kick plates as standard. These form an aesthetic enclosed base on a static unit and an extremely rigid base frame on a mobile unit.

6. 150Kg capacity heavy duty castors for mobile bays that spreads the weight of the unit over a larger area of floor, eliminating "flatspots" on the wheels and making the bays easy to roll.

ECLIPSE®
LIBRARY
SHELVING

Eclipse Classic Steel Library Shelving

### Dimensions - Overall Run Lengths

A run of bays is an initial bay with a number of extension bays. The initial bay is a total of 940mm long and each extension bay adds 900mm to the total length as per the example plan views below. As per Australian Standards, posts are 900mm centre to centre. There is no limit to the number of extension bays that can be added. Please note that 600mm long bays are also available.

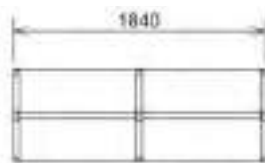

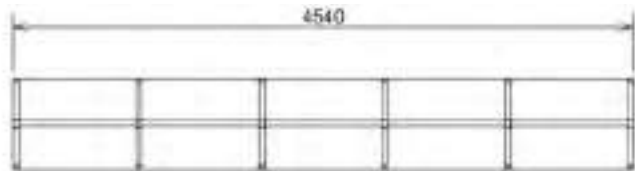

INITIAL BAY   **INITIAL BAY + 1 x EXTENSION**   **INITIAL BAY + 2 x EXTENSIONS**
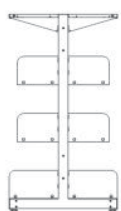

INITIAL BAY + 3 x EXTENSIONS   **INITIAL BAY + 4 x EXTENSIONS**

Dimensions - Standard Post Heights
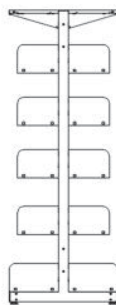

We stock single and double sided in 4 heights, we can supply customised heights in increments of 25mm if required. The tallest post we use is 2500mm.

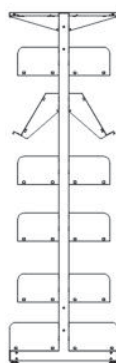

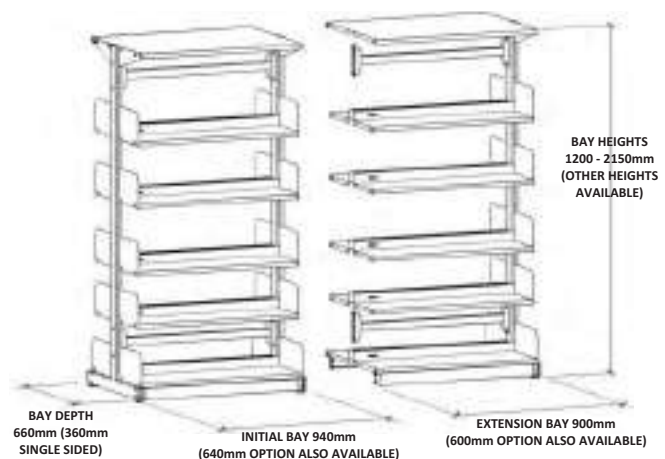

1200H   **1500H**   **1800H**   **2150H**

Planning and Layout Ideas

Proper planning, layout and selection of shelving and component accessories is a very important aspect of today's library design. In most libraries the shelving is the basis for creating zones and functional areas and also help define routes through the library. The position and type of shelving is essential to the smooth operation of the library and needs to be positioned carefully in relation to the walls, columns doors and circulation desk. The layout of the shelving also dictates the layout of seating, tables and the position of booths and workstations. The Eclipse Classic system gives you the flexibility to create the perfect layout for your library.

SOME POPULAR SHELVING LAYOUTS

A: Comb-like
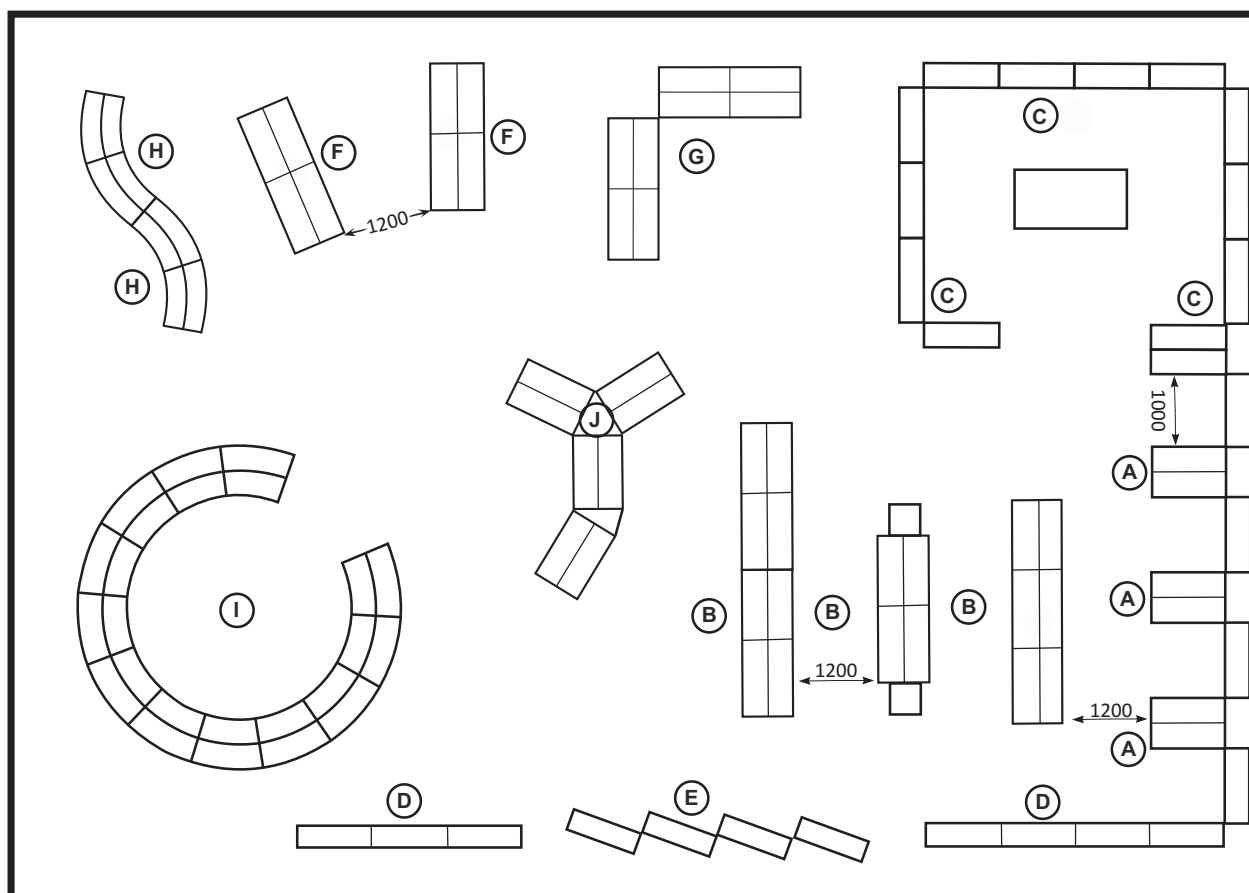

B: Block Rows

C: Wall Mounted Perimeter

D: In Line

E: Diagonally Stepped

F: Fan

G: L-Shaped

H & I: Curved
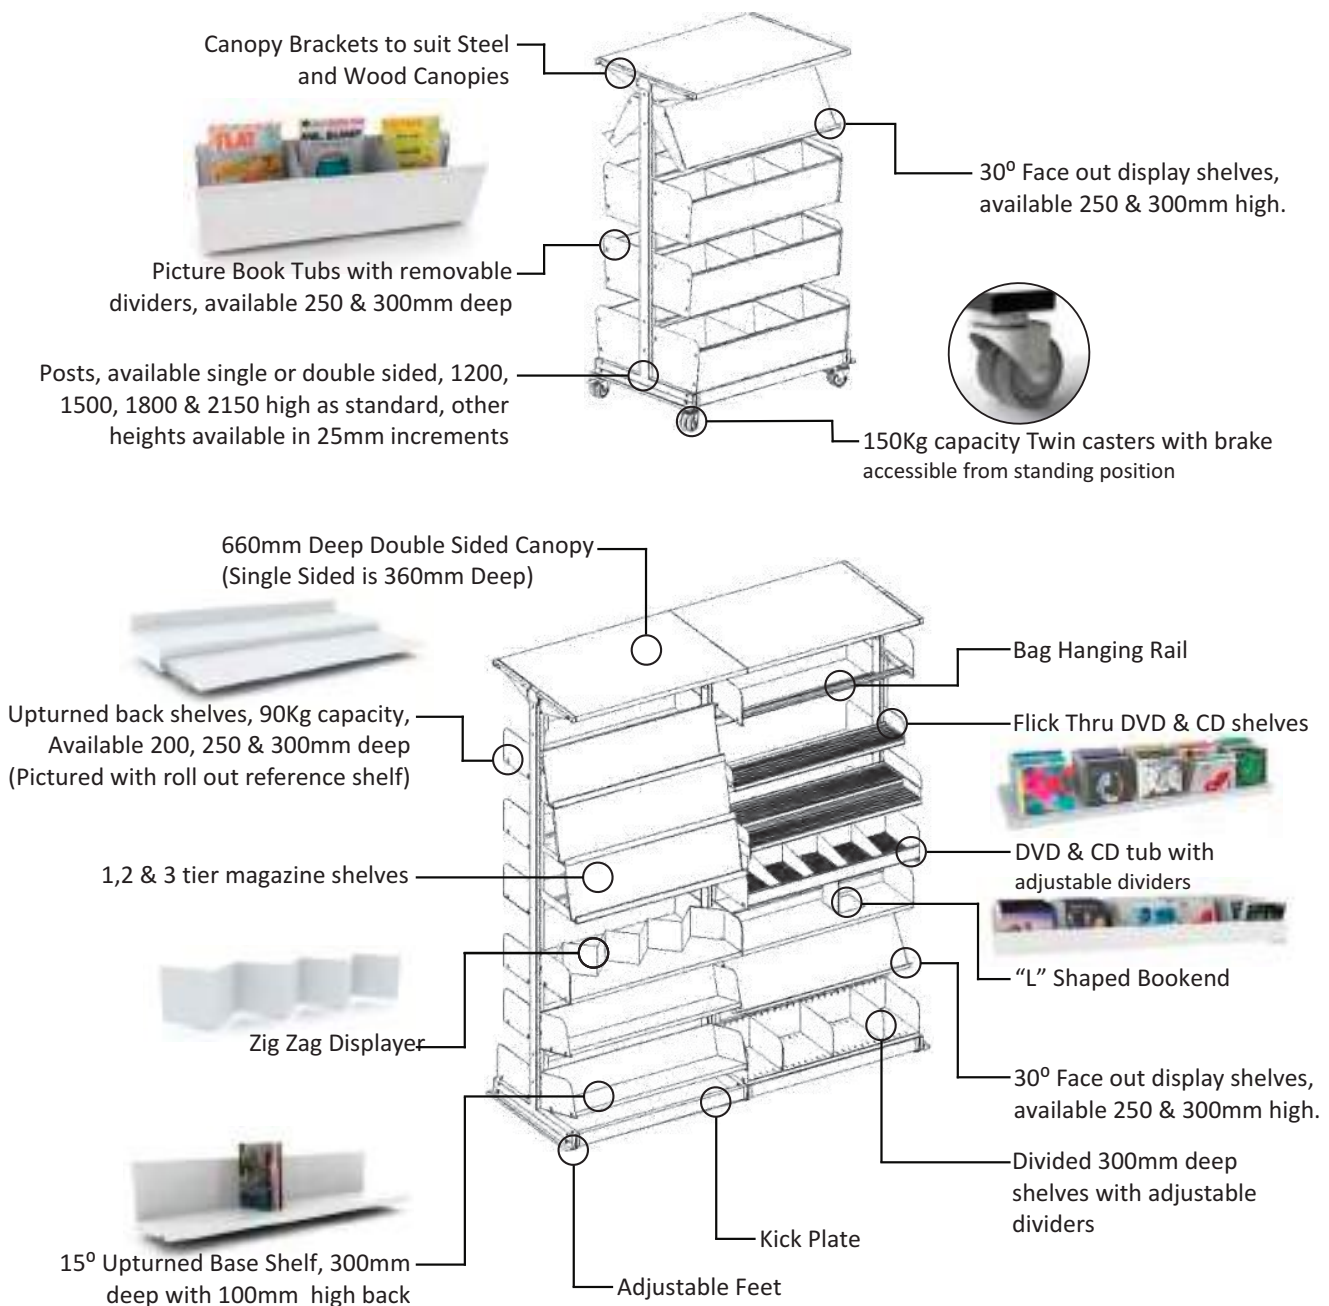

J: Cluster

LIBRARY
SHELVING

Eclipse Classic Curved Steel Library Shelving

Curved Steel Shelves

Eclipse Classic shelving is also available with curved steel upright back shelves. Libraries are typically furnished with straight rows of shelving that organise the space in a hard rectilinear grid. There is an abrupt delineation between these structured spaces and the more open communal areas of the library: the entryways and the sitting and service areas.

If libraries are to compete for their customers against other institutional and commercial attractions their interior furnishing has a part to play to enhance the library experience. Our curved steel library shelving is a response the structure of the straight and enclosing shelf systems. It innovates in a number of ways. The curves can be arranged in a number of different ways to soften the appearance and access to the books. Our curved shelving is the perfect partner for our Freeway and Freeflow bench ottoman series.

Eclipse Milano Library Shelving

Melamine / Veneer with Steel Shelves

Eclipse Milano shelving is also available with our classic steel upright back shelves and accessories. This European styled shelving system was designed in Australia for libraries that need the classic casework look shelving. The casework can be melamine or lacquered veneer with either a matching back panel or choice of perforated metal, acrylic or even no back panels. The ends can be slatted or plain and an accessory acrylic display top is also available. The Milano system can be made as either static or mobile.
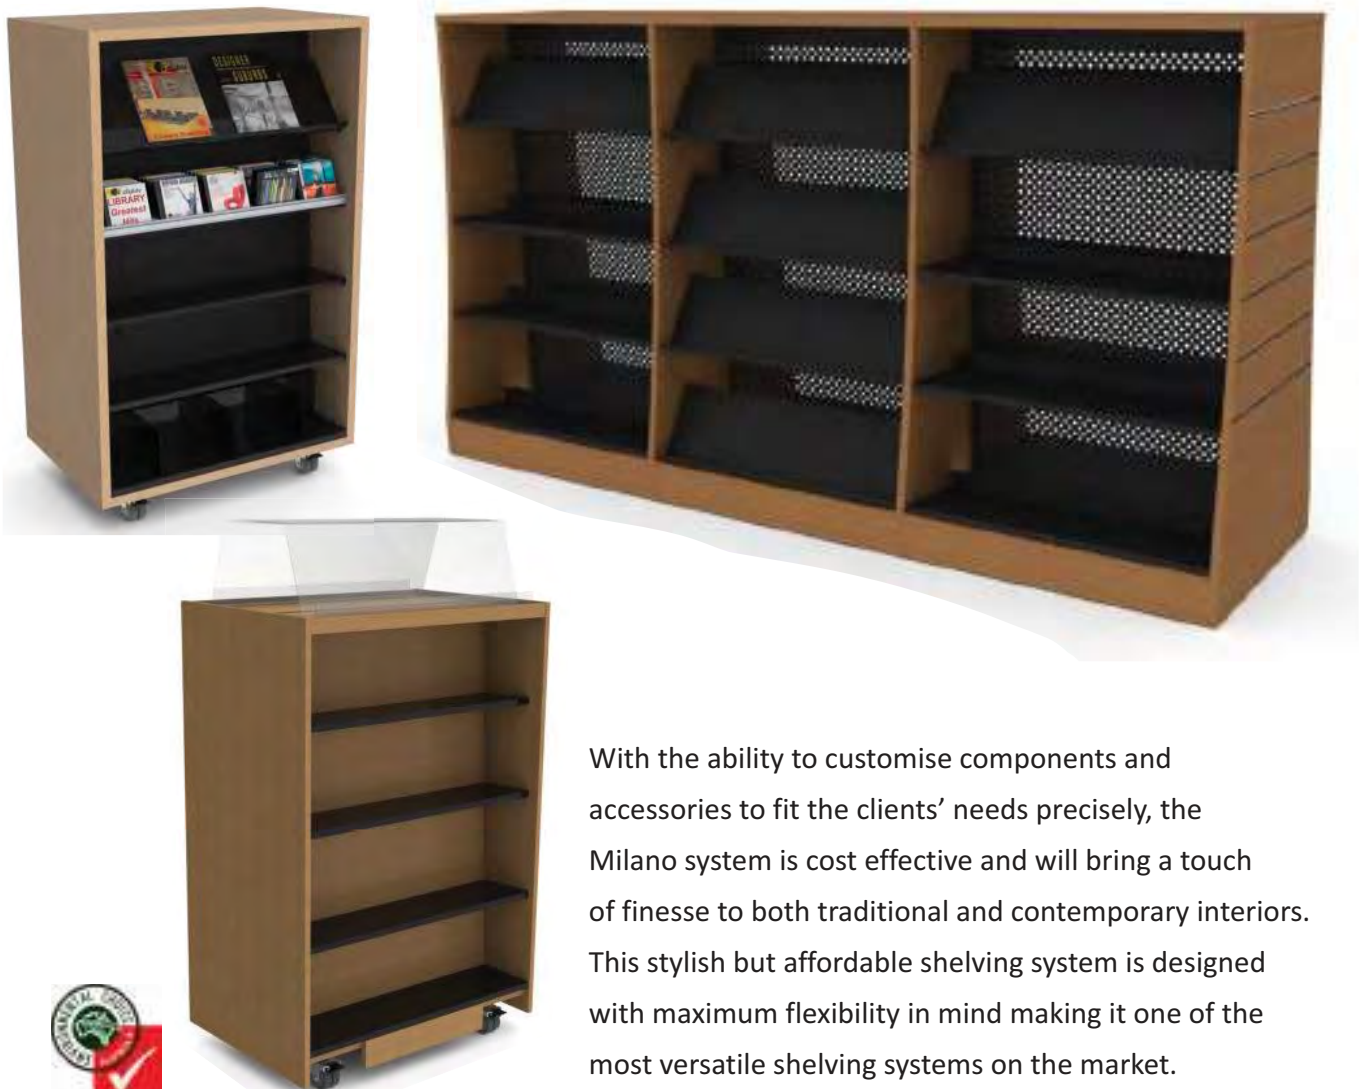

With the ability to customise components and accessories to fit the clients' needs precisely, the Milano system is cost effective and will bring a touch of finesse to both traditional and contemporary interiors. This stylish but affordable shelving system is designed with maximum flexibility in mind making it one of the most versatile shelving systems on the market.

Eclipse Gravity Library Shelving

The Eclipse Gravity shelving system is a fusion of a traditional bookcase and modern art. Gravity shelving injects fun and surprise into the equation by creating modular shelving at varying angles. The tilting panels create a peculiar gravity defying illusion with a curious interplay between the wall and the floor. Gravity comes in a range of modular elements that can be customised to the user's needs, space and colour preferences. It was designed for Libraries that want something a little different than normal perpendicular shelving.

Eclipse Whiteboards

We have both standard and educational whiteboards in our range in wall fixed or a mobile pivoting option.

Educational whiteboards are of heavy duty construction with a porcelain writing surface , aluminium frame, full-length aluminium pen tray with purpose moulded end caps.

Our standard whiteboards have an aluminium frame and stylish pre-formed corners incorporating a concealed fixing system with full length aluminium pen tray.

All of our whiteboards come with Masonry fixings supplied.

Special sizes can be made to order.

Eclipse Pinboards and Noticeboards

Eclipse pin boards and glass fronted noticeboards can be manufactured to any size and shape, they can be wall to wall and/or floor to ceiling. Only materials of the highest standards are used, all boards have a 5 year manufacturer's warranty.

ECLIPSE® LIBRARY & CLASSROOM ACCESSORIES

Free Standing Room Dividers

Whether you need to contain noise, enclose an office desk or partition off an area, these room dividers will make it easy and affordable. Free standing room dividers include steel T-legs which let individual panels stand on their own, allowing you to adjust or rearrange it as needed. Panels are available in a variety of fabric options in varying widths and heights to meet your every need.

Details
- 750 to 2400mm wide
- 600 to 2000mm high
- Colours: custom: made to order

Free Standing Mobile Room Dividers

These flexible, folding screens can be quickly deployed to create a training area, a conference room or even to divide your large space into a number of smaller spaces. Once your meeting is over, simply roll them away and you have your open plan office space again- it really is that simple.

Our Folding Room Dividers can come in a number of colours, materials and sizes so you have full control over which option is best for you. Velcro, printed or woven concertina systems are available.

ECLIPSE® LIBRARY & CLASSROOM ACCESSORIES

Versipanel Acoustic Portable Room Divider

If sound-dampening is a priority, our Versi- series is a great place to start. These portable partition walls are constructed with acoustical ribbed fabric and heavy foam cores. Available in charcoal grey, the VersiPanel is a popular studio partition or office divider due to its superior sound-dampening capabilities and attractive looks. Unlike other partition walls, the VersiPael meets the floor directly from end to end, keeping sound confined. Constructed of multiple small panels, the VersiPanel may be arranged in a serpentine "S" shape, or add a couple optional VersiFoot accessories to create "C" or "L" shapes, which are often used for setting up recording or testing spaces.

Eclipse Hinged Room Dividers

A lightweight folding 3-panel privacy screen. Easy to fold, move and store.1830mm high x 1830mm wide
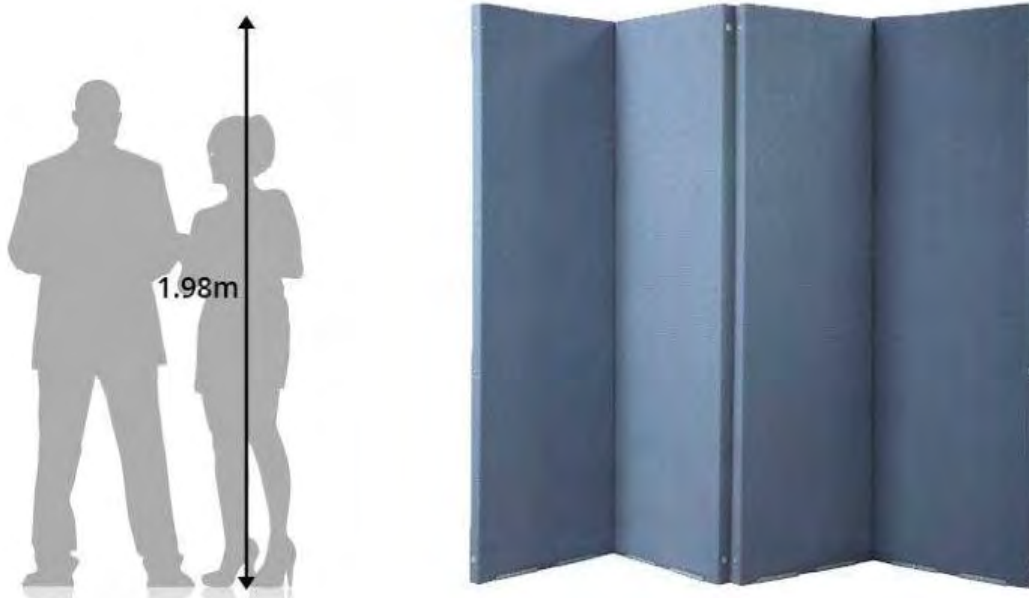

ECLIPSE® LIBRARY & CLASSROOM ACCESSORIES

Eclipse Library Shelving Bayend Panels & OPAC Units

Bayend panels can be used to define spaces, enhance displays or just to add a splash of colour. We have many options to suit your new or existing library. End panels can be completely customized to suit your libraries décor. Attractive Slatwall End Panels are constructed from durable 25mm melamine faced MDF with 2mm ABS edging with an attractive, maintenance-free finish. Stocked in three standard heights, plain or with aluminium slatwall inserts. Customised sizes and other finishes are available on request.

Eclipse Browser Boxes

Eclipse offers a wide selection of browser boxes, ideal for use in school or public libraries. A Browser box is a great book storage unit for children's books and picture books. Browser boxes work really well in classroom reading corners and school libraries as they are compact but will hold a lot of large picture books, helping children use their imagination and keep things tidy. Our browsers feature excellent front-facing display possibilities in exciting and colourful designs. They allow children to browse, select and return books with ease. Our range offers a choice of styles, designs, sizes and bright colours. We also have static and mobile options. A fun addition to your school library furniture. Available in custom colours and different sizes can be made to order.

ECLIPSE® DESKS & DESK SYSTEMS
Eclipse Sit/Stand Desks

Benefits of Sit/Stand Desks

Standing while working for just 4 Hours a Day 5 Days a week Over 1 Year Equals

Standing
31,200 Kcal

Jogging
550Km

Cycling
1,430Km

Swimming
208Km

The Human body is designed to Stand not Sit, the American Journal of Preventive Medicine has stated that limiting sitting to just 3 hours a day, could add two years to your life expectancy.

Standing is like walking, it increases energy, burns extra calories, tones muscles, improves posture, increases blood flow and ramps up metabolism.

Increase calorie expenditure from 2.6 Kcal per Min to 3.3 Kcal per Min when standing.

Reduce lower back pain and potentially lower the risk of employee sickness.

Excess sitting reduces the impact of exercise, the more you stand the more calories you burn when you exercise.

The active way of working is proven to decrease fatigue and improve mood.

ECLIPSE® DESKS & DESK SYSTEMS

Eclipse Electric Sit/Stand Desks

Single Workstation

Single workstations are easy to install and manage. Our extensive range of options mean that we can customise the workstation to your environment.

Standard sizes:
- 1200mm wide x 600mm deep
- 1500mm wide x 750mm deep
- 1800mm wide x 750mm deep
- 620mm to 1270mm high
- 25mm thick top
- Available in Polar white
- Other colours not stocked but available
- Cable management and partition screens available

Programmable Switch with digital readout, preset heights, and much more.

Back to Back & Bench Workstation

Great for large areas, they offer a more structured layout that is easy to maintain. Our back to back and bench system gives you the flexibility to customise and add the features that you need.

Standard sizes:
- 1500mm wide x 750mm deep
- 1800mm wide x 750mm deep
- 620mm to 1270mm high
- 25mm thick top
- Available in Polar white
- Other colours not stocked but available
- Cable management and partition screens available

ECLIPSE® DESKS & DESK SYSTEMS

Eclipse Electric Sit/Stand Desks

90 Degree Workstations

90 degree workstations are the ideal shape for mixed computer and clerical duties because the computer is located in the otherwise "dead" corner space, providing loads of workspace on either side. They are an efficient way to utilise available floorspace as they can be arranged back to back or as a cluster of 4

Standard sizes:
- 1500mm x 1500mm wide x 750mm deep
- 1800mm x 1800mm wide x 750mm deep
- 620mm to 1270mm high
- 25mm thick top
- Available in Polar white
- Other colours not stocked but available
- Cable management and partition screens available

Programmable Switch with digital readout, preset heights, and much more.

120 Degree Workstations

120 degree workstations are an innovative way to create versatile and flexible office layouts. The non linear design allows for a wider variety of workstation arrangements.

Standard sizes:
- 1200mm x 1200wide x 600mm deep
- 620mm to 1270mm high
- 25mm thick top
- Available in Polar white
- Other colours not stocked but available
- Cable management and partition screens available

ECLIPSE® DESKS & DESK SYSTEMS

Eclipse Manual Sit/Stand Desks

90 Degree Manual Sit/Stand Workstations

The Eclipse Manual Sit/Stand desks incorporate frame technology that sets new benchmarks in style and ease of use. It utilises a mechanical crank handle mechanism which gives precise control over height settings from the seated with no under desk intrusions. This allows for great flexibility in design and layout of desktops.

Standard sizes:
- 1500mm x 1500mm wide x 750mm deep
- 1800mm x 1800mm wide x 750mm deep
- 700mm to 1200mm high
- 25mm thick top
- Available in Polar white
- Other colours not stocked but available
- Cable management and partition screens available

Retractable conveniently folds out of the way when not in use.

Single Manual Sit/Stand Workstation

Our single workstations utilise the same technology as the 90 degree workstations.

Standard sizes:
- 1200mm wide x 600mm deep
- 1500mm wide x 750mm deep
- 1800mm wide x 750mm deep
- 700mm to 1200mm high
- 25mm thick top
- Available in Polar white
- Other colours not stocked but available
- Cable management and partition screens available

ECLIPSE® DESKS & DESK SYSTEMS

Eclipse PRISM Desking System

The PRISM desk system is office furniture at its simplest and most efficient level. With rectangular loop leg frames, this easy to specify desk system is tough, stylish and cost effective. As standard the PRISM single, side to side and back to back range is available in 1500mm & 1800mm widths and 500mm, 750mm or1500mm depths depending upon the shape of the top. The Eclipse Prism Desking System is a creative and flexible workstation system to maximise your space efficiency. Featuring modular components and a strong under frame, PRISM is an efficient and cleverly designed system that creates an interactive and collaborative work environment promoting team work and giving you a great deal of flexibility. It is an endlessly expandable bench system that gives you the flexibility to customise and add the features that you need. It can be used as a staff workstations, executive workstations or even conference tables. It can be configured as individual desks, linear bench style, L-shape and 120 degree work pods.

PRISM is compatible with our range of screen systems, soft wiring and cable management.

ECLIPSE® DESKS & DESK SYSTEMS

Workstation Cabling Options

All or our Desking systems are compatible our range of screen systems, soft wiring and cable management. Soft wiring, modular wiring or 'plug & play wiring' enables the easy use and re-use of electrical wiring components when installing or re-configuring commercial office workstations without the waste associated with hard wiring. We can supply the right cabling solution for you.

Benefits Include:

- Cost effective in comparison with the conventional hard-wired solution
- Safe & tidy solution for cable management
- Simple design to allow for adding or subtracting components as required
- Adaptable to suit all power and data requirements
- Easy to install or relocate when required
- Environmentally friendly - all product recyclable

Eclipse Circulation Desks

Custom Made Circulation Desks

Circulation desks may be the most visited area of the library. It services not only the patron but each and every member of the library staff as well. This means it must be aesthetically pleasing on the outside and completely functional on the inside. We know that understanding the workflow of the circulation desk and optimising your space makes a huge difference in the function of your library. Our circulation desks are modular and custom configured to work with your space. In addition, it is designed to provide the maximum amount of worksurface. Whether you are looking for a traditional look, a modern look, or something in between, Eclipse provides the styles, woods, finishes and details to achieve the look you want.

Designed in house and utilising one of our manufacturers for a completely custom desk, both aesthetics and functionality are easily obtainable. Our Library specialists can assist you with the layout of your desk and can provide 3D drawings to give you a good visual of what you're planning.. From concept...........
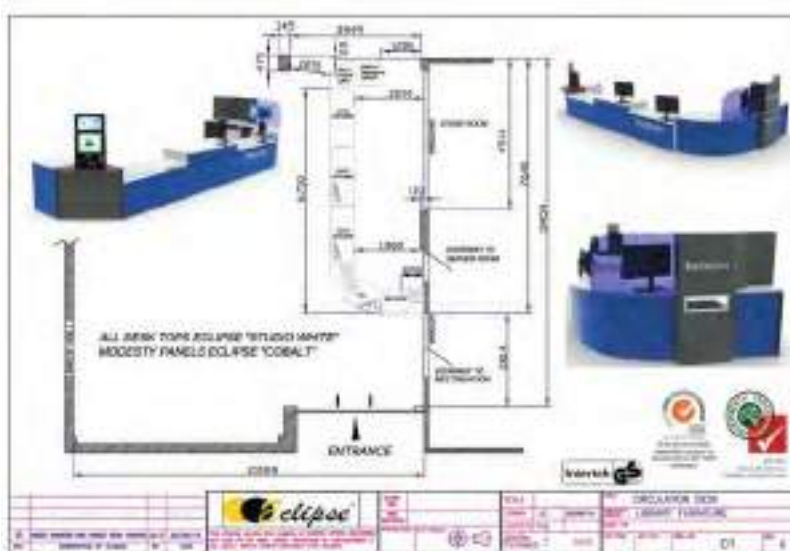

................To Completion

Thornlie Library

This is a modular desk with the following features:

- Fully modular and re-configurable
- 3 sections with electric height adjustment
- Book return slot and dump trolley
- Book trolley storage under curved section
- Perspex screen for till
- 27mm thick laminated tops
- Self check unit integrated with corner unit
- Cable management under tops

Eclipse Blow Moulded Poly School lockers

Eclipse plastic lockers are rotationally moulded, giving them smooth, clean and seamless interiors. Our plastic storage lockers, available with flat or sloped tops, come in three heights and are sold as individual units for design and purchase flexibility. Mix and match plastic locker sizes of and colours for customisation. These plastic lockers are perfect for schools where they are often placed outside on verandahs where superior strength, durability and weather resistance is imperative.

Eclipse plastic lockers are a durable and long-lasting storage solution won't rust or corrode and can be hosed clean, Plastic lockers are an environmentally friendly alternative to conventional lockers, are durable but lightweight, making installation easy.

Advantages:

- Scratch Resistant
- Corrosion Resistant
- Impact and dent resistant
- Easy to clean
- Mildew and odour resistant
- Graffiti resistant (pencil, pen, paint and most common markers)
- Chemical Resistant.

Dimensions and specifications:

- All 500mm deep x 385mm wide
- Compartment heights:
  - 450mm (stack of 4 = 1800mm high)
  - 600mm (stack of 3 = 1800mm high
  - 900mm (stack of 2 = 1800mm high)
- Accessories:
  - Base, adds 100mm to total height
  - Sloping top, adds 150mm to total height
- Colours:
  - Body - grey
  - Doors:
    - blue
    - green
    - yellow
    - red

ECLIPSE®
LOCKERS & ACCESSORIES

Ausfile Locker Seat Stands

Our 450mm high locker seat stands have WPC (Wood Plastic Composite) seat battens. WPC is recommended for difficult conditions where exposure to varying temperatures, moisture and constant humidity are the norm as it does not corrode and is highly resistant to rot and decay. WPC is considered a sustainable material because it is made using recycled plastics and the waste products of the wood industry. WPC can be recycled easily in a new wood-plastic composite. A major advantage that WPC has over traditional varnished wood seat battens is the lack of need for Varnish and its moisture resistance. WPC is highly scratch resistant and the surface colour of the WPC slat is consistent through to the core, meaning that if it was to sustain a score or a nick, it would be hard to notice.

KEY ADVANTAGES:

* Contains renewable resources
* Doesn't warp, crack, split, or rot. (no splinters!)
* Anti-bacterial and anti-fungus properties.
* Less water absorption.
* No VOC's (Volatile organic compounds).
.

* Has the natural feel of wood.
* Anti-slip, due to surface texture.
* Recyclable, even at end of life.
* Low maintenance, no need to apply Lacquer.
* Exceptional screw holding properties.
