

Acoustic Panels

Polyester fibre acoustic panel

Technical information

Materials	100% recycled Polyester fibre with Two surface smooth
Size	1220*2420mm or customised
Thickness	3mm,6mm, 8mm, 9mm, 12mm, 15mm,24mm
Density	1350g/sqm, 1650g/sqm, 2000g/sqm
NRC	0.8 (0.9-50mm Cavity)
Fireproof	B2 & B1 (ASTM-A CLASS)
Installation	3M self adhesive, hot melt adhesive, glass glue, etc (according to different wall surfaces)
Applications	Office furniture, Interior walls, TV Backdrop, Meeting rooms, Auditoriums , gyms, manufacturing workshops, office, pub, hotel, Library, reading room, classroom, kindergartens.

Technical information

Materials	100% Polyester fibre
Weight	0.1-0.65KG/piece
NRC	0.83-0.9
Indoor/Outdoor	Indoor only

Instruction

3D polyester fibre acoustic panel which are based on polyester fibre material, are made of different patterns by hot pressing, There are thirteen developed styles in different. They are widely used for background wall, viewing booth, hotel, club, multi-function hall, conference room and gym, where acoustic performance and aesthetic appeal are important.

Fabric wrapped acoustic panel

Fabric Wrapped Acoustic Panel, also known as fiberglass wall panel or acoustical wall panel, consists of a semi-rigid acoustic fiberglass core covered with an acoustic fire retardant fabric. It's an attractive and versatile rigid fiberglass panel that provide an aesthetically pleasing solution to your reverberant noise problems. These sound absorption panels can reduce the reverberation in large spaces and improve room acoustics for the ease of listening to speech and music. Resin hardened edges are an option for increased durability on panel sides and corners.

Technical information

Materials	Fibreglass panel, fabric
Size	1200*1200mm, 1200*600mm, 600*600mm or customized
Thickness	20mm, 25mm, 50mm
Density	100 KGS/CBM
NRC	0.9
Fireproof	B1
Application	Interior walls, Meeting hall, heater , music hall , gym, manufacturing shop,

Wooden acoustic panel

Wooden acoustic panel- a range of perforated, grooved or slotted timber ceiling and wall panels, incorporating the latest perforation techniques to maximize sound absorption and reduce reverberation. Wooden acoustic panels are available in a standard range of veneers and laminate surfaces. Customized panels can be arranged for large projects requiring special decorative patterns, surfaces, lacquers, or paint finishes.

Basic material	E0 MDF/ Fire rated MDF/ MGO/ A grade fireproof material
Finish	Melamine / Veneer / Painting / HPL
Back	Black acoustic felt
Length	2440mm
Thickness	12mm/ 15mm/ 18mm
Width	133mm/197mm
Groove width	2mm/ 3mm
C-C distance	8mm/ 16mm/ 32mm/ 64mm

Perforated Acoustic panel

Basic material	E0 MDF/ Fire rated MDF/ MGO/ A grade fireproof material
Finish	Melamine / Veneer / Painting / HPL
Back	Black acoustic felt
Length	1200mm/2400mm or customized
Thickness	12mm/ 15mm/ 18mm
Width	600mm/1200mm or customized
Perforated diameter	3mm~10mm
C-C distance	16mm/ 32mm or customized

Micro Hole Perforated Acoustic panel

Basic material	E0 MDF/ Fire rated MDF/ MGO/ A grade fireproof material
Finish	Melamine / Veneer / Painting / HPL
Back	Black acoustic felt
Length	1200mm/2400mm or customized
Thickness	12mm/ 15mm/ 18mm
Width	600mm/1200mm or customized
Perforated diameter	0.5mm/ 0.8mm/ 1mm
C-C distance	4mm/ 8mm or customized
